Related Applications

This application is related to the co-assigned and co-filed applications, "Method for
5 managing multiple channel maps from multiple input devices in a multimedia system,"
"System for time-shifting events in a multi-channel convergence system," "Method and
system for associating web sites to television programs," "Individualized parameter
control for multiple media sources in a data processing system," "System for scheduled
caching of in-band data services," and "System for combining electronic program guide
